

# Priefert® DualCoat

Products carrying Priefert's DualCoat label are constructed from galvanized, in most cases galvanized, steel and then powder coated with an architectural grade powder coat finish to provide two layers of protection for your investment. DualCoat products are long-lasting, corrosion resistant, and require less maintenance than their traditional counterparts, making them ideal for use in the harshest environments. The extended lifespan of these products make them a valuable investment for customers who are looking for quality, durability, and longevity.

## Introducing DualCoat Premier Panels & Gates

The trusted standard just got stronger. Priefert's most tried, tested, and proven panel line, Premier Panels & Gates, known for being "Tough Enough for Cattle, Safe Enough for Horses," is now available with DualCoat Technology. Built with a layered defense system, DualCoat combines the strength of galvanized steel with a durable powder coat finish to deliver unmatched protection against rust, wear, and weather.

- *Corrosion-resistant finish that extends product life*
- *Reduced maintenance needs, saving you time and money*
- *Ideal for a variety of different environments including coastal and highly corrosive*

With DualCoat, you get the reliability you trust from Priefert, now made to last even longer.
